Our Vision

A world where art intentionally elevates our experience and well-being through thoughtfully designed and innovative spaces.

In business for over 30 years, Skyline Art is an award-winning team of designers, artists, and production specialists with architectural, interior design, and fabrication expertise.

We offer creative design services and end-to-end project support. We specialize in bringing visual representations of your brand, culture, and community to life.

We curate original art as well as leverage our in-house printing, framing, and fabrication capabilities to create elevated, intentional spaces—delivered on time and within your budget.

We are experienced across a range of business sectors including hospitality, corporate, healthcare, education, and government. We provide donor and foundation support. Our network of original artists working within various mediums is vast, we listen, and we take pride in our ability to specify and install art at any scale.

No project is too big or too small—we enjoy them all!
